

Physical Map of South Asia

I. Use the map provided to label the following physical features and cities:

1. Eastern Ghats
2. Western Ghats
3. Cape Comorin
4. Thar Desert (also called Great Indian Desert)
5. Deccan Plateau
6. Ganges River
7. Indus River (You will need to draw this river in on the map.)
8. Brahmaputra River
9. Himalayan Mountains
10. Indian Ocean
11. Bay of Bengal
12. Palk Strait
13. Arabian Sea
14. New Delhi
15. Bombay (Mumbai)
16. Madras (Chennai)

II. Use colors and symbols to represent the different physical features on your map. Use a different color or symbol for each feature. Include a map key to show what the colors and symbols represent on your map.

III. After you label all of the features on the map, write a brief description of the following features on the back of your map. You may use the textbook to find descriptions.

Himalayan Mountains
Ganges River

Indus River
Indian Ocean

Brahmaputra River
Bay of Bengal
